**THE OYEN NEWS**

## Wheat Crashes To New Low Levels

Since the end of the first week of October, wheat has declined over 24 cents, and some of the low grades are now removed from the pool daily price list. From Nov. 8 to Nov. 15 (inclusive) wheat dropped 10 cents. On Monday of this week it rallied 3 cents, but in a wild session yesterday dropped 8 cents to a new low level. From this point it rallied 2 1/2 cents. Today the market has shown a little more strength and a further rally of 2 cents was recorded.

Today's Winnipeg futures are quoted: Nov. 60 1/2, Dec. 59 1/2, May 64 1/2, July 65 1/2.

## Annual Agricultural Meeting

The annual meeting of the Oyen Agricultural Society was held in the Masonic Hall at Oyen, Alberta on Saturday, November 15 at 2 o'clock, with less than 20 members present.

The meeting was called to order by President Gibson. The minutes of the annual meeting of November 16, 1929 were read and adopted, and the financial statements showing the year's operations were read and accepted.

Judges reports covering the fair were read. The results of the election of officers for 1931 were as follows: President, F. S. McNeel; 1st Vice President, D. Warwick; 2nd Vice President, W. J. Ada.

It was decided to leave the election of Secretary-Treasurer to the newly elected directors. The following men were elected directors: G. S. Peck, A. McQuarrie, Alf Gibson, E. H. Church, S. H. Abbott, T. O. Stephenson, D. Peck, C. G. Peterson, R. Gates, J. P. Kerr, J. O'Brien, Thos. Lees, R. E. Gillespie, J. J. Kelly, F. S. Austin, J. P. Hornbeck, R. P. Hall, H. M. Regan, J. D. Armistead, E. H. Davies and Gus Schmitt.

The following women were elected directors: Mrs. H. M. Regan, Mrs. C. S. Wright, Mrs. Thos. Lees, Mrs. Hugh Johnson of Benton, Mrs. R. E. Gillespie and Mrs. C. P. Snyder.

Mr. W. J. Ada was elected auditor for 1930.

A vote of appreciation was extended to Mr. Alf Gibson, the retiring president, for the efficient manner in which fairs were conducted during his term of office.

A meeting of the newly elected directors was held immediately at the close of the annual meeting.

A committee was elected to meet a committee of shareholders of Oyen Fairs Association to discuss the amalgamation of Oyen Agricultural Society and the Oyen Fairs Association.

## NOTICE TO CREDITORS AND CLAIMANTS

In the estates of William David Lewis and Blanch Lewis late of the District of Benton, Alberta, Farmers, deceased.

Notice is hereby given that all persons having claims on the estate of the late William David Lewis and Blanch Lewis who died in the month of June 1928, are required to file with the undersigned Executor of this estate, by the 31st day of December 1930, a full statement duly verified, of their claims and any securities held by them, and that after that date the Administrator will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed or brought to his knowledge.

Dated this 19th day of November, 1930.

E. C. SMITH,  
Benton, Alberta.

## M. D. Golden Centre

The 7th meeting of Council of the M. D. of Golden Centre No. 272, was held at N.E. 13-30-5, West of 4th on Saturday, November 1.

Members all present. The S.E. 20-20-5-1, was rented to Garrett Morris.

Financial Statement to date was read and accepted. Following accounts were paid: L. Holmes, repairs on wells and streets in Sedalia, 17.50; Alberta Gazette, Tax Sale notice, 3.20; Royal Bank, excise stamps, 10.00; Holman Bros., express on repairs, 1.15; W. H. Sheppard, blacksmith account, 1.75; Saskatchewan Fire Engine Co. (fire), 32.30; Citizens Lumber Co., sidewalks for New Bridge, 202.10; Perry & Bourk, relief for Mrs. Patrick, 55.80; Ralph Greene, salary, 133.30, office expense, 10.00 and Bailiff fees, 43.40; Mrs. O. Michaels, rent, 4.00; Sedalia Hardware, glue and nails for 23-30-4-1, 16.75; taxes on N.E. 1-20-4, 141.00; Alberta Association of M. Ds., membership fee, 20.00; O. Holman, Constable fee, 75.00.

By law No. 31, a by-law to amend No. 31, extending the period of prohibition of stock running at large during the current year, to November 25th was read three times and adopted.

The following election officers were appointed and bounties returned: Returning officer, Thomas Barker, at a fee of \$30.00, nomination to be held in Golden Centre schoolhouse; in Golden Centre schoolhouse, Ward No. 2, booth at S.W. 25-25-5, D. Turnbull, D.R.O.; Ward No. 4, booth at Cop Hill schoolhouse, W. J. Blair, D.R.O.; Ward No. 6, booth at McConnell schoolhouse, J. E. Kerr, D.R.O.

Councillors Hoard and Stewart were appointed as delegates to Annual Convention of Association of Municipal Districts with A. Jorgensen as alternate. Council adjourned to meet at N.E. 13-30-5 on Saturday, December 6, at 10 a.m.

Ralph Greene, Sec-Treas.

## WEDDING

### EVERSON-BROWN

Miss Cora Leah Brown, daughter of Mr. and Mrs. C. E. Brown of Oyen and Gordon L. Everson, son of Mr. and Mrs. O. P. Everson of South Water Street, Crawfordsville, Indiana, were united in marriage on Saturday, November 1st, at 10:30 a.m., in the First Christian church with Rev. James H. Wilson reading the single ring service in the presence of relatives and friends.

Immediately following the ceremony Mr. Everson and his bride departed for their honeymoon and upon their return will be at their home in this city, where Mr. Everson is employed in the office of a printing company.

The groom was a graduate from a Crawfordsville High School and had achieved two years in the Purdue University at Lafayette, Indiana.

The bride was formerly a student of the Ethelton High School in Saskatchewan in 1928.

## IN LIGHTER VEIN

"Darling, may I kiss your hand?" asked the young man with old-fashioned ways. "Sure, kid, hop to it," said the Modern Jane, "but be careful you don't burn your nose on my cigaret."

## A New and Better Attitude

The world is passing through a period of depression from the evil effects of which practically no civilized nation is exempt, and the more highly developed and industrialized a nation has become, the more severely is it suffering from the prevailing depression. Undoubtedly, it is not wise to unduly dwell upon or stress existing hard times, and the tendency to do so should be resisted, but, on the other hand, it would be even more unwise to ignore facts, deliberately shut our eyes to them, and not make the required effort to overcome and shorten the present evil, seek for causes of it, and take necessary steps to prevent its recurrence.

There have been many such periods in the past, and there will, in all probability, be more of them in the future, despite all that man can do to prevent them. In fact, human failings and the depression are the underlying causes of these periods of depression, and their entire prevention will only be brought about by a complete reform of the human race. The present period differs, however, from former periods of depression in at least two important respects, both of which are the outcome of a changed attitude on the part of the vast majority of people towards our whole social and economic structure.

First, there is greater interest taken in relief measures than ever before by governments, corporations, and individuals alike. We no longer regard money as necessary. We may not have learned yet how to prevent it, but there is a widespread and growing belief that the thing can be done and there is considerable willingness to make sacrifices to attain the desired end.

No longer is there callous indifference to the suffering caused by reason of unemployment. We have progressed to the point of realizing that the homeless casual laborer is not the only or even the principal sufferer in such times as these. We have learned to concentrate attention and relief upon the families of the unemployed who are permanent members of the community. We have come to realize that the difficulties of hundreds of thousands are not of their own making, and that they cannot be allowed to suffer want and utter privation. We have learned, too, that it is better to provide emergency relief work for these people than to hand out doles and make them recipients of charity.

Thus in this present period of depression we find relief works being undertaken on a scale hitherto unknown. In Canada, it means that over \$100,000,000 will be expended in order to provide temporary work for those lacking employment. This, of course, is not a cure, nor is it a preventive. It is merely an amelioration of existing conditions. It means, too, that as a people we are mortgaging our future, because these \$100,000,000 or more will be borrowed money upon which we must interest for many years to come. But it is better to utilize these moneys in providing work than to dole it out in charity. Furthermore, if the works instituted are of the right character, in a word, if they are of a permanent character and productive of good to the country in the years to come, and the money thereon is not wastefully expended, they may even prove factors in creating and maintaining a new prosperity and slaving off this present period of depression.

But an even more important aspect of this present period of depression is discovered in the efforts being put forth to find out what caused the depression, and how to climb out of it, and how to avoid again falling into a similar state. We now realize that a good deal of the economic thinking of recent years has not stood the test of the last twelve months. But, as the Chicago Tribune puts it, we have not lost one product of boom times; we still think that it is the business of an economic system to make for human employment. Economics is not the dismal science to make for human employment. Economics is not the dismal science to make for human employment. Economics is not the dismal science to make for human employment.

It is one thing, of course, to believe that a deep seated ill ought to be cured and quite another to cure it. And while there is no justification as yet for thinking that the depression is a permanent one, it is a fair counter, there is a considerable warrant for a tempered optimism. Some of the latest mind in business and in the universities are directed toward the solution of the business cycle rather than toward the depression. We are developing a technique for alleviating the worst effects of depression, which will be of value even if a cure is not found. The outlook is far from hopeless.

## Power From Nelson River

### British Dominion Syndicate Makes

Offer To City Of Winnipeg  
Offer of blocks of power from the proposed White Mud Falls development on the Nelson River in Northern Manitoba has been made to the city of Winnipeg by the British Dominion Power Syndicate, it is stated. The proposal made in a letter from Sir Reginald Brade, head of the syn-

dicate, was referred to J. G. Glasco, manager of the city hydro system, commencing in 1935, blocks of power ranging from 20,000 to 100,000 horsepower would be available, according to the letter. According to the letter, the offer comes ten years ahead of the game, and cost of transmission would be very cheap. The report will be submitted to the city utilities commission at its next session.

### Ready For Action

Mother was trying hard to arrange a match between her daughter and the wealthy young landowner. "Beatrice," she said to her daughter, "if Harold asks you to be his wife tonight, tell him to speak to me." Beatrice nodded, and then said: "And if he doesn't ask, Mother?" "In that case," said her mother, "tell him I want to speak to him."

For Dry Skin—Minard's Lintment.

## Blindness In Many Cases Is Preventable

Preservation Of Sight Should Be Taught In Schools  
That one-half of blindness among children is preventable, and that the prevention of blindness should be first taught in the schools, is the opinion of Miss Mary C. McLellan, National Field Secretary of the Prevention Department of the Canadian National Institute for the Blind, Toronto.

Miss McLellan said that her department was in favor of text books with larger type being used, as they are in the States. A child with defective sight would have to strain to read small type at present used in text book publication. In order to consider the publication of such a book when the new reader for the western province comes out, a committee has been formed, with Dr. Fletcher, of Winnipeg, as head. A survey is also being made in an effort to have sight saving classes instituted in the larger cities, she said.

## Television Is Improving

Spectators See Actors Distinctly At Distance Of Thirty Miles  
Images as clear as those seen in the average motion picture theatre are projected by a television transmitter which has been tested in Germany. The spectators are able to observe the vividly clear pictures much as if they were at a moving picture show. The transmitter catches pictures with a sharp lens having a clarity of 50,000 light points a second. By the use of photo-electric cells these light points are changed and transmitted on a 70-meter wave. Spectators 30 miles distant can see the clear and sharp pictures of the actors with the utmost distinctness.

## Danger From Colds

Every woman beyond middle age should realize that a majority of the troubles she has to fear have their origin in what are known as common colds. Each attack lowers her vitality and reduces resistance to disease. A cold which attacks the throat and sinuses, especially that which is followed by a sore throat, should be treated after any cold, however slight. For Dr. Williams' Pink Pills are a reliable tonic.

There is no need to a mere stimulant giving temporary relief. The thing that is rich red blood which imparts the permanent health, steadies the nerves, improves the appetite and digestion, and enables the user to carry on, standing the rigors of our Fall and Winter months. They are sold by medicine dealers or by mail at 50 cents per bottle. Dr. Williams' Medicine Co., Brockville, Ont.

## British Columbia Apples

New Market For B.C. Apples Being Developed In South America  
British Columbia apples now have a regular market at ports on the east coast of South America, according to F. C. Gardle, manager of the Empire Shipping Company Limited. This development of the British Columbia market was brought about by recent consignments of apples to that company last year; this year's shipments representing an increase of 400 per cent.

Miner's Pen Powders work so effectively that no traces of worms can be found. The pests pass away in the stools without being perceptible. They make an entire and clean sweep of the intestines, and nothing in the shape of a worm can find lodgment there when these powders are in operation. Nothing could be more thorough or desirable than their action.

Siam Entry For Grain Show  
The Kingdom of Siam, through its Ministry of Lands and Agriculture, is making preparations to be officially represented at the World's Grain Exhibition and Conference at Regina in 1933. Siam's exhibit will consist of varieties of their country's best rice.

Large Sum For Civic Improvement  
About two thirds of a million dollars have been expended by the City of Trail on civic improvements during the past seven years, according to the latest figures from the city hall.

## Some People Lucky With Blind Purchases

King's Warehouse in London Sells Some Valuable Property  
What the Lost Property Office is to an ordinary railway, the King's Warehouse, situated in Lower Thames Street, London, England, is to the Customs and Excise Department of the British Government. Here are dumped articles and merchandise left unclaimed by the individuals to whom they had been consigned, plus a considerable proportion of confiscated smuggled goods. From time to time these articles are put up for auction, and great bargains are not infrequently picked up. On one occasion a small cask, labelled "contents unidentified" in the catalogue was sold for seven shillings. When the purchaser took it home and opened it he found a waxy substance somewhat of the appearance of marble which proved to be ambergris, that precious product of a dissolved whale worth about \$10 an ounce. There were approximately 40 lbs. weight of it in the cask, and was sold for about \$1000. On another time a lucky bidder obtained possession, for the sum of half-a-crown, of a small cardboard box, labelled in the catalogue as containing "seabirds' eggs—various." On examining his purchase, he found amongst the eggs of a number of different species of sea-fowl. Later on, it realized at auction for its fortune under the nice little sum of \$1500.

## Safety League Formed

Officers Are Elected At Meeting Held In Regina  
A safety league for Saskatchewan has been organized following a meeting of the representatives of the government with representatives of the cities and clubs of the province held at the International Grain and Hay Show, Chicago, was from the Peace River country, namely, Herman Treile, of Wemlock, Joseph H. B. Smith, of Wolf Creek, Alberta, last year's winner, is also an Alberta farmer, but is located outside of the Peace River District.

Other officers who were elected at the meeting included: Honorary vice-presidents, Premier J. T. M. Anderson, Hon. M. A. Macpherson, Hon. J. A. Mackenzie, Hon. F. D. Munroe and Hon. P. H. MacMillan, M.P. Vice-presidents, His Honor Judge W. O. Smyth, Swift Current; Sidney Smith, Regina; Richard Loney, Moose Jaw; Ralph Miller, Prince Albert; Mayor L. A. C. Panton, North Battleford; H. C. Garner, Weyburn; Mayor John W. Hare, Saskatoon, and Mayor Robert Barbour, Yorkton.

## "Audible Museum" In Berlin

Phonograph Record Made In 1908 Is Among Collection  
The piercing wail of a grief-stricken Korean, the merry song of a Roumanian tailor, the wailing of an Italian cowboy and the lingering call of a Spanish night watchman are some of the exotic sounds which the treasured will shortly be able to hear in an "audible museum" soon to be opened in Berlin under the direction of the Ministry of Posts. A recently found primitive phonograph record of Count Zeppelin's voice in which the father of the airship appeals to the German people for support of his project will also be included. This record dates from 1908, shortly after a disaster to one of his airships at Schierding, and includes the words: "In a few years my airships will conquer the world." Acting on the belief that appropriate sounds of the world are necessary to the Ministry intends to incorporate a series of phonograph records with various exotic and interesting folk songs to be heard on the voices of such men as Edison, Marconi, Lindbergh, and a host of historical interest; as well as sounds from other lands and other times in so far as they are collectable and recordable.

## Proved His Honesty

A pick and shovel brought on credit 17 years ago from George Paine, an Ashabula, Ohio, hardware merchant, has just been paid for. Paine received a letter, postmarked Michigan City, Ind., containing \$2 and the following note: "Seventeen years ago you trusted me with a pick and shovel. I told you I would pay you the first time I found \$2. I just found it today. Here it is. The honest men are not all dead yet."

Asthma No Longer Breadth.  
The dread of renewed attacks from asthma has no hold upon those who have learned to rely upon Dr. J. D. Kellogg's Asthma Remedy. They are certain that it will always do what it makes claim. They do not yet learn how safe you are with this preparation at hand get it today and now for yourself.

Origin Of Common Expression  
The expression "to put a spoke in the wheel" would suggest adding strength to a wheel, although actually the saying is used to indicate that somebody's progress has been barred. It has its origin, no doubt, in the far-off days when vehicles had solid wooden wheels. Holes were bored in some of these so that the driver who wished to put on the brake could do so by pushing through one of the holes a piece of wood, called a spoke, and thus prevent the wheel from revolving.

Minard's Lintment refreshes the scalp.

## Peace River Bacon

Bacon Hogs Now Shipped In Carloads From Peace River To Vancouver

Less than 30 years ago, the Peace River District of Alberta, an extensive area of country northwest of Edmonton, was considered even by some agricultural experts as unsuited for productive farming. It is now one of the best wheat and other grain producing areas in Canada and also is growing in importance in mixed farming. Bacon hogs now being shipped in carloads to Vancouver. Among the principal buyers of the Peace River hogs are the Vancouver Department Stores. Housewives of that city say that the bacon from Peace River is of the finest quality and like Oliver Twist they want more. One of the most recent Canadian winners of the world's wheat prize at the International Grain and Hay Show, Chicago, was from the Peace River country, namely, Herman Treile, of Wemlock, Joseph H. B. Smith, of Wolf Creek, Alberta, last year's winner, is also an Alberta farmer, but is located outside of the Peace River District.

## Imports Of Soviet Coal Increased 12 Per Cent. Over Last Five-Year Average

Canada imported 51,578 tons of Russian anthracite coal during September, it was reported by the Dominion Bureau of Statistics. The total imports of coal increased 12 per cent. over the last five-year average. Practically all the bituminous and representative of the anthracite came from United States. The domestic output during September amounted to 1,129,838 tons, a decline of 9.2 per cent. from the last five-year average. Nova Scotia mines produced 473,307 tons; New Brunswick mines, 14,100 tons; Saskatchewan mines, 32,789 tons; Alberta mines, 546,033 tons, and British Columbia mines, 163,026 tons.

On Oil That Is Famous—Though Canada was not the birthplace of Dr. Thomas' Electric Oil, it is the home of that famous product. From here its good name was spread to Central and South America, the West Indies, Australia and New Zealand. It has far and wide to attest its excellence, for in all these countries it is on sale and in demand.

## English Rhetoric In Germany

Difficultly Sometimes Encountered In "Country" Advertisements  
The one advertising slogan everyone over in Germany understands is: "Say it in English." In rare cases where the English in those announcements is less clear than one finds in advertisements here, the text usually gains in flavor what is lost in rhetoric. For example, a certain resort assures prospective visitors it has "a cure that cures rheumatism, gout, sciatica, neuritis, golf, tennis and fishing."

## Suffered From Heart Trouble

Became Weak and Run Down  
Mrs. Wm. Diotte, Glensandford, Ont., writes: "For a long period I suffered heart trouble, and became very weak and run down. I tried various remedies, but they did me no good. One day I met a friend and told her of my trouble. She said she had heart trouble for two years too, but after using Milburn's Heart and Nerve Pills for a short time I had been relieved of my trouble so I took two boxes and after taking them I was again feeling fine and always recommend them. I tell to anyone complaining of heart trouble."

Price 50c. a box

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

## Keep Foods Deliciously Fresh

Keep your foods—cakes, bread, pies, cut meats, etc.—under a covering of Parafilm Heavy Waxed Paper. You'll be amazed at the length of time they'll stay fresh, delicious! HUNTER-MARTIN & CO., REGINA, SASK.

## Air Mail Service

One Hundred and Seventy-Two of Mail Carried by Planes East and West

For the three months ending September 30, the aircraft engaged upon the 12 air mail services which now operate in Canada carried 118,300 pounds of mail, bringing the total from the beginning of the current year up to 379,424 pounds, or roughly 170 tons. One half of the services operate out of Montreal.

Two new services are projected, according to the quarterly report of the civil aviation branch of the Department of National Defence. One will run from Amos to Moose in Quebec, 42 miles, and the second from the Peace River to North Vermilion in the North West Territories. The latter calls for 16 return trips during the winter and will be continued for four years.

The report shows that there are 500 aircraft flying in Canada, while the number of pilots is 717, of whom 403 are commercial pilots. The Dominion has 72 air harbours.

Exceeding Eastern companies in mileage were the planes of Western Canada Airways, Winnipeg-Manitoba, carrying 5,564 passengers, 316,895 pounds of baggage and express and 70,375 pounds of mail. The percentage of regularity on schedule times was rated at 97.4.

The report says that 13 later, moderate airlines are being leased, fenced in and graded with runways between Moose Jaw, Saskatchewan, Saskatoon, Saskatchewan, and Lethbridge-Edmonton, Alberta, a distance of approximately 600 miles. An airway beacon is being installed at each corner of each airfield, while at present at Fort McMurray, Regina, Sask., Maple Creek, Sask., Lethbridge and Red Deer, Alberta.

There are 21 light aeroplane clubs in the Dominion. For the months ending September 30, members of these organizations had flown 11,367 hours. The month's flight totalled 2,887. Ontario has the largest number of flying clubs, with nine. Saskatchewan has three, Manitoba and Alberta, two each, British Columbia, one.

## A Boun To Motorists

New Non-Skid Road in Chelsea, England, Promoted Success

A road surface which it is claimed eliminates all danger of skidding, is now being manufactured from British asphalt, mined in the island of that name in the Dutch East Indies, and a recent demonstration in the borough of Chelsea, England, was regarded by the borough engineer and others as a success. After the road which had been treated with the material was watered, a number of motor cars were driven along it at high speed and brakes were applied violently, but there were no traces of skidding, and when the drivers tried deliberately to make the cars skid they could not do so. It is claimed that the new asphalt is made of a natural and uniform mixture of bitumen and shells.

## An Interesting Building

Jerusalem Chamber Near Westminster Abbey, London, England, Has Historical Associations

At the foot of the Wren Towers of Westminster Abbey, is a low, grey stone building known, after certain tapestries which used to hang on its walls, as the Jerusalem Chamber. It was built by Abbot Lylington in 1376, and in it the abbots of Westminster entertained their guests. Here died Henry the Fourth, and here Henry the Fifth became King. Here the Committee for the revision of the Bible worked for four years. Here Addison and Sir Isaac Newton lay in state. This beautiful chamber is cedar-paneled, and contains fine ancient glass and a contemporary portrait of Richard the Second.

"Late again. Have you ever come on time?"  
"Yes, I bought a car."

He: "Remember, darling, the doctor has forbidden you to loathe."  
She: "Yes, but he hasn't forbidden me to wear a bathing costume."  
—Re Rolling Hair Times, Copenhagen.

W. N. U. 1864

## What Machinery Does

Displaces Labor But Makes Vast Number of New Industries

An English newspaper writer makes a feature of publishing extracts from the files of one hundred years which included one recently which stated that "an assemblage of about 400 agricultural workers at Hardness, Kent, proceeded in a body to destroy the reaping machines in the neighborhood."

England was then much more of an agricultural nation than it is now. The lower classes were largely peasant people to whom farming represented a ready source of employment, and it is quite natural that they should regard with dismay the introduction of machinery that tended to supplant manual labor.

The same thing happened fifty years earlier when Richard Arkwright invented machinery to do the work of cotton spinners. Molis destroyed his machinery and burned down his mill at Chorley, Lancashire. But machinery has been of undoubted benefit to farms, and it has made cotton about the biggest single industry in England.

Men had scarcely been trained for their attitude toward machinery in those days. They could not foresee the revolution which would follow, nor the markets it would create by cheapening and increasing production at the same time. Had the example of those who had been formerly followed and a ban put upon the introduction of machines in all forms of industry, the world would have been held back to a degree that is incomprehensible. Machinery displaces a lot of labor in some respects, but at the same time it made a vast number of new industries, including that of making machines. Taken in the widest view of the circumstances it is doubtful if machinery has ever displaced a single workman.

At the beginning of this century, there was an infinitesimal number of automobiles. Had a powerful farm bloc in every Parliament been pushed through legislation to ban the "horseless carriage" (as it was "hugely called"), on the ground that it would injure the horse-breeding industry, what would have been the state of world unemployment today? Ten years ago there was no commercial radio. Today hundreds of thousands of people are engaged, directly and indirectly, in the vast enterprise of broadcasting. What radio did not turn out, by the millions, every year, would have avoided the ranks of unemployed.

And who can predict what new industries will be employing hundreds of thousands of men and women ten years hence?—St. Thomas Times-Journal.

## The Woman Farmer

Increasing Number Taking Up Agriculture Work in England

The Over-Seas Daily Mail (London), says: Quite one of the most pleasant spots in which to ramble in this England of ours is the wide neighborhood of a training farm for girls or one of those farms which are mainly in the hands of those efficient young women who are happily more numerous than used to be the case. Here you seem to have been transported into a youthful world of abounding health and vigor.

I am told that more women than ever are taking up agricultural work, many with the idea of seeking homes in one of the Dominions ultimately others as gardeners or poultry women at home, and others to use the latest farming knowledge on parental farms. Established farmers seek them enough now to give their daughters really practical education of the latest and best kind at the best available schools, so that they can be of use not merely for the dairy but in all branches of the industry.

Large Amount of Mail Carried

According to the Postmaster-General's annual blue book, 8,574 pounds of mail were carried on the Winnipeg-Calgary and Regina-Moose Jaw Edmonton air mail routes during the department's fiscal year ending March 31, 1930. In all 180 single trips were scheduled and 173 actually carried out with a total of 82,683 miles flown. On all Canadian routes during the 12-month period, some 25 in. a total of 426,289 miles were flown and 458,219 miles flown.

## Doctor Defends High Heels

High heels have kicked up a lot of discussion, pro and con, but have found a staunch defender in Dr. Fraser Gurd, of McGill University Medical School, Montreal. The elevated heel, he told the practitioners attending the International Medical Assembly at Minneapolis, not only does not cause flat feet, but prevents the wearer from fracturing her ankle in case of a fall.

## Wins C. P. R. Scholarship

Clifford Brown, Lenoirville, Quebec, has won the C. P. R. Scholarship

Clifford Brown, Lenoirville, Quebec, has won the C. P. R. Scholarship for 1930. The scholarship was awarded to him for his excellent record in the Junior C. P. R. Club competition held recently at Sherbrooke, according to an announcement made by Dean Brown of Macdonald College. The successful candidate entered the Diploma Course at Macdonald, commencing on November 1.

One hundred boys from calf clubs throughout the province took part in those competitions and, of these, thirty-seven were eligible to compete for the scholarship offered by the Canadian Pacific Railway Company. These thirty-seven boys came from twenty-one different clubs and seventeen counties in the province extending from Argenteuil on the north shore of the Ottawa to Temiskaming on the south shore of the St. Lawrence.

Clifford Brown, a member of the Lenoirville C. P. R. Club, scored a score of 543 out of 600 on judging, 96 out of 100 on his general efficiency as a club member, 45 out of 50 on oral examination, and 35 out of 50 on his exhibit, a total of 739 out of a possible 800 points. His nearest competitor was Stanley Boig of Argenteuil, who obtained a total score of 714 points.

The scholarship is tenable at any agricultural college in the province of Quebec, the winner elected to attend Macdonald College.

## Housekeeper Gets Exercise

Walks Yearly Distance Equal To San Francisco From Boston

For some time elaborate tests have been conducted to ascertain how far various types of people walk as they do their usual work or play.

It has been learned that an average almost 8 miles a day, although a policeman was checked at 14 miles and a letter carrier at 22. A goodly walked 8 1/2 miles playing 18 holes (no mention was made of his score).

A housekeeper, without leaving the house, walks every year a distance equal to that from Boston to San Francisco, and the woman goes down town to shop she averages about 8 1/2 miles in the stores alone.

The Geodetic Survey Of Canada, of the Department of the Interior, plays an important role in the development of the Dominion, providing by its work an accurate basis for all kinds of other surveys whether relating to the making of maps or charts, the laying down of interprovincial and other boundaries, or the construction of power-houses, dams, canals, railways, irrigation ditches and the like.

Flood lighting of church exterior is being tried in England.

## Mind Would Keep Pace

Natural To Suppose Healthy Old People Would Have Active Brains

An eminent United States surgeon and doctor, discussing efforts being made to extend the span of human life, has stressed what he considered the fallacy of added years of bodily strength if the mind continued to weaken about the usual time. But would it be just to suppose that if the sound body be carried on toward the century mark in man's life, the sound mind will keep it company? This authority rather scoffed at the idea of promoting greater length of years, but this is not a good attitude to adopt toward old people. There is nothing more beautiful in life than serene and happy old age accompanied by good health, even though physical strength be weakened.

The greatest wisdom of a life well lived develops in the mind of old people a philosophy that should be the envy of those who still are struggling in the vortex of modern activities, competing in the mad race for wealth, fighting for eminence in public life, striving after social distinction, and the other evanescent glories of the world. Old people do not care anything about these things. They have seen wealth vanish in a day; they have seen the public turn and rend its favorites of yesterday; they have seen the most powerful social ladder is a position of the greatest peril.

One would listen to old age benefit by its advice and experience, and pursue a more rational method of living; there would be more vigorous contentment than there is in life, and no doctor or other authority, no matter how eminent, would dare hint that they are only in the way. Longer and better live the old folks—Toronto Globe.

## Playing Steady Game

Good Fellow Tells What Is Wrong With Business

The business visitor responded to the usual question of "How's business?" with this parable:

"I play golf and enjoy it. My normal game is somewhere around 90. In the early part of the season everything was just right, my temper and my digestion and the weather and the wind and all the things that help or hinder the game. The result was that I made a 78."

"If now suppose," he said, "that worst of a game I play, I should say, Oh, I break 80. Suppose I should feel that everything was in a wrong every time I don't land in the 70s. What kind of time would I have as a golfer?"

"And that's been one of the troubles with business. Many companies 'broke 80' in the first half of 1929, and because they failed to do it in the first half of 1930 they think they are completely ruined when, the truth is, they are playing a good steady game and improving a little bit every day."—Nation's Business.

## Chinese Taking Over Jobs

The day when a foreigner could obtain a good job with the Chinese government and amass a fortune in a few years, is apparently over. A highly trained Chinese are replacing foreign engineers in almost every service. A month now seldom passes but what several foreigners who thought they had life jobs, see their posts turned over to the Chinese.

## Canada's First University

In the town of Windsor, Nova Scotia, a tablet has been erected by the National Parks of Canada Branch, Department of the Interior, commemorating the founding of King's College, in 1789, the first university in Canada and the oldest in the British overseas dominions.

## JAPANESE STUDENTS AT TORONTO UNIVERSITY

Above are shown Mas Patricia Sugawara (left), young Canadian-born Japanese variety student of Vancouver, and Tamam Sugawara, another young lady of Japanese birth, who are the female representatives in the newly-formed Japanese students club at the University of Toronto.

## Problems Of The Farm

Chances Have To Be Taken On All Hand Profitable Harvest

That famous old saying "the work of science and of enterprise, period on the millinery, is the 'designer's' as a house," said the designer of her sister ship, "except for the millinery chance." Unfortunately for the designer, the chances of her sister ship and every enterprise saw to it that this triumph of human skill and enterprise was confronted by that chance. When he faced up, this mechanism designed to show man's conquest of the air proved as helpless as a bubble in Niagara gorge.

Farmers are continually confronted with the millinery chance. Some seem to be able to dodge the issue or what is more likely, they are dealt with so tenderly by the forces that work for man's defeat that they really never have any serious difficulties. In many cases these folk listen to their own whims, or, worse, in a fatal still, they listen to the words of the flatterer and become a little more vain and reckless generally. Then the millinery chance comes, and the cattle will not fatten profitably, the grain is caught with heat or drought or the farmer's market is a mess, or they sell at the wrong price of the market or investments go wrong persistently and proud man is fouled up at the shores of failure.

For a farm has more problems than any airship in existence. The dairy, the stock raising, the grain, and these three with problems. Then there are all the risks of the market and all the risks of the farmer's market. "You never can tell," but those few words express precisely the atmosphere in the farmer persistently lives. An airship is a far more likely to make a successful voyage than is a farm likely to yield an all-round profitable harvest.

## Light In Ocean Depths

Recent Discovery Shows It Is Purcell Violet Color

Levels of the ocean provided with violet-colored daylight, like a scene in a fairy tale illuminated by the purest violet light, are reported by the American Museum of Natural History as a recent discovery of the expedition of the U. S. Fish Commission Society now exploring the ocean off Bermuda. Dr. William Beebe, leader of the expedition, found five deep-sea dives, some to depths of over 1,000 feet, using a new steel diving sphere. Windows of clear fused quartz withstood the outside pressure of over six hundred pounds to the square inch and permitted the observers to look out. Close to the sea's surface, they found, the light was orange-yellow, but as they descended all red and yellow colors of the spectrum faded out completely. Next the blue colors faded, leaving only the pure violet rays of the extreme end of the spectrum where the wavelengths of light are shortest. At depths of 700 feet and below, the outside world of water still seemed to glow dimly with these extreme, almost colorless violet rays.

## Resume Herd Trek

Delivery Of Reindeer From Alaska Will Likely Be Effected On Time

Canada's herd of 3,000 reindeer is once more on the trek across the roof of the world. Latest advice to the Interior Department, at Ottawa, indicate the drive of those animals, which was temporarily suspended during the summer and fall months, has been resumed and delivery of the reindeer on the eastern slopes of the Mackenzie River delta will probably be effected on scheduled time.

When the drive began last November, the stipulation was that the animals would reach the grazing grounds near the mouth of the Mackenzie River early in 1931. Purchased by the number of reindeer from the Loman Corporation of New York was made by the Canadian Government in order that the Yukon and the Indians in the north-land might have their food supplies supplemented.

## Private Planes In England

The number of privately-owned aeroplanes is steadily increasing in England. Nearly 800 men and women in the country now operate their own "planes and more than 24 own two or more ships each. Many business men are securing "planes" from the salesmen, and on quarry uses "planes" to send out samples of stone by air to its customers.

Captain and mate wrote the ship's log alternately, and the mate being drunk, the captain faithfully recorded the mate's drunken log. On the following day the mate, seeing what had been entered confidently "alcoholic," faithfully recorded: "The captain is sober today."

## Prevention Of Diphtheria

Diphtheria Can Be Wiped Out And Lives And Dollars Saved

If for ten years or less, Canada were to pay as much money towards preventing diphtheria as it is now paying for curing it and burying its victims, it could be virtually eliminated. And yet at the present time 15,000 Canadian residents are exposed to serious and dangerous attacks each year, with 1,200 annual fatalities.

How does diphtheria kill, and how can its ravages be averted? First of all it is a germ disease. A healthy human child (children are diphtheria's victims for the most part) who happens to be susceptible to this disease, is suddenly attacked by a number of tiny, invisible germs. These lodge in the youngster's throat and feed and multiply. They give off a waste product which is a deadly poison, and this poison spreads throughout the system. A victim of diphtheria dies either by nature to fight against infection. Often, this defending army of the bloodstream was the fight against the diphtheria germs, and when that happens, the patient gets well.

Now once recovered, such an individual rarely gets the disease again. The defending army in his bloodstream has learned how to repel the attack of this particular germ.

Comparatively recently, doctors have discovered a substance called "toxoid," which, when injected into a human body, induces the blood to develop that same resistance to an attack of diphtheria. In other words, the immunity to diphtheria which a patient naturally develops, it is now possible to give to a child by a simple, safe series of injections under the skin.

Your own family doctor can administer this treatment and it is up to all parents to make sure that their children get the treatment. It is simple and sane and practically painless. At one time the City of New York immunized 10,000 infants with toxoid without any ill-effects whatever.

How much simpler to have your children undergo this simple treatment than to have your house quarantined, your children in a child's every public health department would see that this marvelous treatment is put at the disposal of every parent, and if only all parents would insist on protecting their children with it, diphtheria could be wiped out of Canada within ten years, and hundreds of lives and thousands of dollars saved every year.

## Likely To Be Popular

Increased Demand For Canned Whole Chicken Is Expected

In a survey report recently published, the veterinary director general of the Dominion Department of Agriculture calls attention to the increasing demand for poultry products processed under government inspection. The packing trade are canning more and more poultry in Canada, and there appears to be room for considerable development in the field of canned chicken. Canned whole chickens made its appearance on the market last year and from the reception accorded it, the new business is likely to develop into one of considerable proportions.

Canadian Cattle Welcome  
A welcome for Canadian cattle at the port of Birkenhead, England, was promised by Mayor T. McCellan. The number of reindeer from the National Union of Distributive Workers, of which he is national organizer, made a presentation. They could confidently expect to receive a considerable proportion of the 15,000 cattle available for export before the end of the year, he said.

There are more than 8,000 varieties of dahlias on the market.

"That stupid Frenchman is sitting on my hat and I don't know of French."—Hummel, Hamburg.

# Army Of Enumerators Will Be Employed In Taking The Decennial Census Of Canada

Fourteen thousand enumerators, 215 commissioners to direct their work, and a considerable number of others, will find employment next year in the taking of the decennial census of Canada.

The commissioners — one for each electoral district — will be appointed right after New Year, while the enumerators will be chosen in March or April, to permit of instruction prior to the actual date of the census, which will be on June 1st. The census taking, of course, will require considerable time, varying in accordance with the area covered and the density of population. But what is to be put down are all the facts and figures as they may be on June 1st, regardless of what changes may occur later, and the census is published. It is necessary to fix on some arbitrary date.

Anticipating the approval of the Government just now, the census is being organized as soon as this sanction is forthcoming are the regulations governing the conduct of the census. There are several new features. Each successive census being more elaborate, past censuses have not here but in other countries will be available. Of the Bureau of Statistics is constantly exchanging ideas with the international statistical organization. In the new schedules, complete as they have been heretofore, there will be further details in agriculture and industry, and the point over which some contention has arisen as to Canadian nationality will be covered. A person who says he is simply a Canadian will be put down as such, although it is desired that in the past it was necessary to make such distinctions.

The census must also take into account some seeming anomalies in the law.

For example, under the immigration act, even a Britisher must be in Canada for five years to year, and can acquire Canadian domicile, and yet if he has been here only six months he can vote or be forthwith elected to Parliament. The schedules will be so numerous as to set forth all the facts concerning the individual and his origin from year to year.

One of the entirely new features of the census is that, for the first time, years ago, had to be covered on foot or by canoe or dog train. Incidentally, the tabulation was delayed until these returns came in. Next year, they will be as prompt as the rest.

While the census is taken completely every 10 years, check on it is kept from year to year, and the figures are such as to indicate a normal growth but no extraordinary increase in population. Although quite an army of competent people will be required for the census business, the problem will be only one of selection, because there are plenty seeking the job. The appointments are to be made by the Government and not under the Civil Service Act, and so political influence may count.

**Predicts Speedier Planes**  
Rocket Craft Expert Believes 5,000 Miles Per Hour Possible  
Here Fritz Von Opel, German rocket craft expert, predicts the airplane of 12 years hence will be a rocket propelled conveyance that will fly 20 miles above the earth at a speed of 3,000 to 5,000 miles an hour.

"I not it sounds ridiculous to talk of travelling 5,000 or even 3,000 miles an hour," said Von Opel, "but in a few years that speed will be commonplace. Theoretically, my experimental planes will do that, but they have not been developed on a practical basis."

The United States has at least 85 species of native golden rod.

## Substitution Of Barley For Corn

**Experimenting Stations Are Testing Feeding Value Of Both**

A question which is causing considerable study this year is that of reducing the amount of corn purchased by Canada and the substitution of barley, a home-grown feed. The feeding value of a home-grown feed to that of corn is being given careful study at several experimental stations and already there have been several definite recommendations made for the use of this grain in at least partial replacement of corn.

The large part of the Canadian imports of corn go to the feeding of hogs and poultry. For the former, the barley has been long known to rival corn as a feed both in its value as a fattener and for a part of the ration of the growing hog. The quality of finish produced by barley in conjunction with oats or other feeds is generally believed to be superior to that of the corned hog.

In the poultry industry, the use of barley in place of corn is not nearly well established. There is a certain value in the use of barley, and the use of yellow corn in the poultry ration which is rather difficult to replace. General indications are that the corn content of the laying mash can be substituted at least partly by barley, with the ordinary spread in price between the two. It will probably be found profitable to do so.

For fattening chickens, there is reason to believe that a good percentage of well ground barley in the feed will work out quite satisfactorily.

Barley and corn are both known as high carbohydrate feeds, and with the exception of the difference in hull formation and in the vitamin content of the yellow corn pigments, may be considered in much the same light as fairly strong heat producing and fattening feeds. Should the price spread favor barley to any extent during the coming winter and especially if the feed has a quantity on hand, he should be quite safe in using a considerable portion of it in place of the corn he must ordinarily buy.

**Saskatoon Poultry Association**  
Egg Laying Contest Organized To Run For A Year

The Saskatoon Poultry Association has organized an egg laying contest, beginning November 1st and running for a year on similar lines to that of the Dominion Government. The object is to secure for members of the Association past records of individual birds for the twelve months which will furnish valuable data to those who are desirous of increasing the egg-laying propensities of their flocks, but who have not time nor facilities for conducting the breeding of true-to-type birds that will lay a profitable number of eggs of good size and color.

**B.C. Motor Truck Company**  
A motor truck manufacturing company established in Vancouver 21 months ago at a cost of a quarter of a million dollars, has now commenced production for the first nine months of the year more than equalling that of the whole of last year.

She—"Silence gives consent, you know?"  
He—"Except when you ask a hanker for a loan."

Policeman—Miss, you were doing sixty miles an hour!  
She—Oh, isn't that splendid? I only learned to drive yesterday!

**HEAVY WINTER TRAVEL IS PREDICTED**  
Heavy winter travel is predicted for the coming season.

## Canada's Fish Industry

**Should Get More Support From Canadian Consumers**

Business can be stimulated and more work can be found for our own people through the persistent purchase of Canadian instead of foreign goods. In no sphere of life can this policy be more easily followed or of good effects be more quickly seen than in the every-day use of the household, especially of food. It is strange that though Canada has the finest fisheries in the world, the consumption of fish at home is relatively small; and, at the same time, we seem to think it necessary to buy considerable quantities of foreign fish year after year, the imports in 1929 amounting to no less than \$4,174,508.

If we reduced the imports of foreign fish and eat more of our own, the fishing industry would benefit enormously, and no industry is more worthy of encouragement. Fishermen, both inland and on the two seas, are plain people who buy and sell exclusively goods made in Canada. It is not reasonable for consumers in Canada to reciprocate by buying more use of Canadian fish, and thus to increase the purchasing power of Canadian fishermen? The industry has an importance which goes far beyond the value of the fish itself. It is nearly \$60,000,000, and in 1929 the production was more than \$50,000,000. The money realized from the fisheries is spent with manufacturers of iron, brass, rubber, cordage, four textiles, requiring, in fact, its ramifications are felt throughout the country, and directly or indirectly it gives employment to many thousands of workmen, hundreds of miles away from the scene of operation.

Each family in the land consumes even a few more pounds of Canadian fish it would give a great stimulus to an industry which already contributes so largely to the prosperity of Canada.—Toronto Mail and Empire.

## Livestock Sales

**Figures For Past Ten Years Shows Heavy Business Done At Moose Jaw Stock Yards**

"During the past ten years," says "The Optimist," "some 792,994 cattle, 51,081 calves, 698,343 hogs, 238,944 sheep and 10,112 horses were handled through the stock yards at Moose Jaw, according to figures furnished by the Saskatchewan Co-operative Stock Yards. In other words, more sheep and swine were handled through the Moose Jaw yards in the period under review than the entire number of ewes and sows present in Saskatchewan in 1929." In that year there were in Saskatchewan 1,168,913 cattle, 207,551 sheep, 699,500 swine and 1,122,757 horses.

**Punished Enough**  
The scene was a revival meeting, and during the course of the evening a masculine woman rose and spoke of the value of kindness. "Look at my husband," she said. "He's allus been a terrible traitor; but how does I treat him? When he comes home from the Pig and Whistle who for drink, what does I do? Do I hit him? No. Do I spank him? No. Do I clear out an leave 'im? No. I just puts me arms round his neck and kisses 'im."

A voice from the back of the hall called out, "Serves 'im jolly well right."

Howell—Do you work for a living?  
Powell—I work for it, but I don't get it.

# Study Of The Whole Field Of Federal And Provincial Taxation Is Thought Necessary

The ever widening problem of raising revenue for administration purposes and public undertakings by both provincial and the federal governments, has reached a stage that calls for thorough examination of the whole field of taxation, according to views advanced at the convention in Toronto, of the Canadian tax conference and the Canadian civil service research conference.

With delegates in attendance from widely separated parts of the Dominion, the conference applied itself to the study of the country's tax structure and offered suggested remedies in meeting some of the more outstanding problems.

Duplication and lack of uniformity taxes levied in the various provinces should invite tax reformers into action, declared A. E. Crayler, of Toronto Board of Trade. Lack of uniformity, he said, proved a baffling problem for business interests operating over a large section of the country, while overlapping arising in connection with the income tax was often considered "unfair."

In a paper submitted by Prof. H. R. Kemp, Department of Economics, University of Toronto, two primary problems were set forth: How to secure increase of revenue needed to meet the commitments of the Dominion, and how to improve present arrangements for obtaining revenue.

The Federal Government, he said, faced a deficit of about \$40,000,000 while the provinces and municipalities also were confronted with the need of augmented revenues to meet obligations and undertakings. At present existing taxes are not sufficient to meet these needs, he asserted.

It was also suggested by Prof. Kemp that collection of municipal income taxes should be made by the federal authorities, who would then turn the amount over to the municipal authorities. This, he said, would increase the net revenue from the tax. "Various public utilities also could yield large sums in case of necessity," he added.

**Shows Great Variation**  
Every Country Has Its Own Manner Of Eating

Nothing is more curious than the different manners of eating which are correct in different countries. We see an ancient graven on a plate, because good manners formed that we should seek it up with a piece of bread, and not with a knife. Yet in France, a knife is used to cut the food, and a spoon is used to eat it. In Germany would mark one as not knowing the habits of polite society if he did not use a knife from the end of the spoon. Another—too curious custom is the French one of resting the hands all over the table, directly they have finished a course; to sit with them in the lap is not good manners. This reminds us of a story a woman told once of a foreigner her father asked to the house. At dinner the first joint asparagus was served, and the visitor, having watched fervently what other people did, ate it in his fingers as to the manner born. The next night he appeared as a vegetable, and the young man, quite sure of himself this time, started on a highly telling bit in his fingers he had done the asparagus. Now, did the laws of perfect breeding demand that he should be commended for following suit, or not? It is a matter of perfect host that on one occasion when entertaining some visitor whose table manners were not very civilized, and who took up his finger bowl, and drank from it, he, after one glance round the somewhat astonished table, took up his finger bowl, and also drank from it!

**Champion Sheep Shaker**  
Interesting Contest At Saskatchewan Annual Sheep and Swine Show

H. Swinchart, Hutton, was adjudged the champion all around sheep shaver when a contest was held at the exhibition grounds, Regina, in connection with an annual Saskatchewan sheep and swine show. H. Swinchart, of Regina, gained second place in the contest, which was judged by W. C. Heron, H. Swinchart, J. R. Hutton, H. Swinchart, W. W. Thomson, western manager of the Canadian Co-operative Wool Growers Association.

Sheep shearing results follow:  
Hand shearing contest—1. A. Simpson, Regina; 2. H. Swinchart, Hutton; 3. Archie Stewart, Altonburg; 4. Calvin Pratt, Mather, Man.; 5. J. Whitehead, Nutana, Sask.; 6. Ben Wilson, Shellbrook; 7. J. Bayne, Selkirk; 8. John Brisbane, Laura.

Machine shearing contest—1. H. Swinchart; 2. John Jones, Bangor; 3. J. Whitehead, Nutana.

Arthur Hutton, Hutton, was announced the winner of the Heron challenge cup, donated for annual competition by W. C. Heron, Hutton, Sask., for the best Saskatchewan bred Oxford sheep, three years or under. The cup was won in 1929 by A. M. Barnett, Hutton.

**New Exchange Building**  
The officials of the Winnipeg Stock Exchange are being commended for their decision to go ahead with their construction programme which involved the new exchange building to be erected on Main Street at a cost of about \$25,000.

**The Magnetic Compass**  
The magnetic compass has been in common use for more than 700 years and it is more widely used today than ever before. On the sea, under the stars, on land, and under the earth, it is used for finding direction. It is necessary to the sailor and the explorer, to the surveyor and the miner who borrows below in deep pits.

The pathway to success may be up-hill, but it never is crooked.

## Encourage Swine Industry

**Saskatchewan Government Arranges For Easy Purchase Of Breeding Stock**

Encouragement of the swine industry in Saskatchewan is promised under a new arrangement, according to Hon. W. C. Buckle, Minister of Agriculture. Under this arrangement, farmers will be enabled to purchase sows for breeding purposes through the Department of Agriculture upon making a payment of 25 per cent of the cost and giving notes for the balance.

"In recent years, while we had a 50 per cent cash option for the purchase of swine," Mr. Buckle said, "most farmers preferred to pay cash. This year on account of the scarcity of money, we are inaugurating this new plan."

## How Women Lose Fat In England

How would you like to lose unhealthy fat that you don't need and don't want, and at the same time feel better than you have for years?

How would you like to lose your double chin and your too prominent abdomen, and at the same time make your skin so clean and clear that it will compel admiration?

How would you like to get your weight down to normal, and at the same time develop that urge for activity that makes work a pleasure and also gain in ambition and personal sense of mind?

Get on the scales today and see how much you weigh—then get a bottle of Kruschen Salt. Take one teaspoonful every morning in a glass of hot water, and when you have finished the first bottle weigh yourself again.

Now you will know the pleasant way to lose unsightly fat, and you'll also know that the six vitalizing salts of Kruschen have presented you with glorious health.

That's the way Englishwomen keep slim—why not you?

## WORLD HAPPENINGS BRIEFLY TOLD

A small sheet of the first commercial size produced in Manitoba was sent Mayor Webb by officials of the Hudson Bay Mining and Smelter Company at Flin Flon.

Toronto's first and only woman bank head, 37-year-old Mrs. E. M. Boyle, of Buffalo, N.Y., sentenced last April to two years in reformatory, has been released on parole.

A stump buried through the roof of the camp building during blasting operations killed the infant daughter of Mr. and Mrs. William Schuster, Sugar Lake, B.C.

With the immediate object of putting the Canadian fishing industry on its feet, Hon. E. N. Duggan, M.P., arranged for an exhaustive survey of marketing catches at every stage from the fisherman to the consumer.

Canada could aid in the economic recovery of Australia by buying more Australian goods, Lord Stoneham, former governor of Australia, said in an address to the Canadian Club at Victoria.

Announcement has been made by E. W. Healey, president of the C.P.R., of the acquisition of a site facing Berkeley Square for the big hotel proposed to be erected by the company in London, England.

Interpreting the London Times announced the death of Desmond Leeson Simpson, British author, who wrote under the name of Patnam Weale, from wounds inflicted by three Chinese gunmen who invaded his house and shot him in the back.

The Prince of Wales is understood to be planning to sail for South America, January 15, on the ship which has been arranged for him to open the British Trade Exposition at Buenos Aires. He will pay visits to other parts of South America and the West Indies.

### Grassy Lake Coal

Coal Obtained By Methods New To Commercial Mining In Alberta

The recent shipment of a car of high grade lump coal, hilled from Grassy Lake, Alberta, to Winnipeg, is of unusual interest. Apart from its marking the revival of coal shipments for Grassy Lake was shipping coal to Saskatchewan in 1909—this shipment has a special interest in that the coal was obtained by methods new to commercial mining practice in Southern Alberta. Future shipments will be watched with considerable interest.

**Holstein Herd Has Good Record**  
Three Holstein cows, members of a herd owned by James A. Thomson of Moose Jaw, have just finished yearly records in the R.O.P. with a production averaging 15,600 pounds of milk, containing 637.50 pounds of butter.

## DO YOU SUFFER FROM CONSTIPATION?

Countless remedies are advertised for constipation, many of them for the moment but they are habit-forming and must be continued. Others contain colored and dangerous mineral drugs, which remain in the system, irritate the bowels and cause headaches and pains. Some are harsh purgatives which cause griping and have a depressed after effect.

Avoid irritating oils which only grate the irritated bowels and encourage nature's machinery to become lazy. A purely vegetable laxative such as Carter's Little Liver Pills, gently touches the liver, bile starts to flow, the bowels move gently, the intestines are thoroughly cleaned and constipation passes away. The stomach, liver and bowels are now active and the system enjoys a perfect state of health. All druggists 25c and 75c red packages.

### The Deadly Monoxide

Four Points Motorists Should Remember About This Poison Gas

Every motorist who is tempted on cold mornings to start his car in the garage and allow the engine to warm up with the doors and windows of the building closed, should remember these four points about the deadly carbon monoxide gas—

You can't see it!  
You can't smell it!  
You can't taste it!  
But it is deadly!

Keep the doors and windows of your garage open when you have the motor running, or better still, don't let it warm up until you are in the driveway.

Don't run your motor in a closed garage. Statistics show that the hazard of carbon monoxide poisoning, while not very prevalent when compared with other accident dangers, is gaining rapidly. Last year there were more than twice as many deaths from this cause as in 1924. In 1928 and 1929 death rates from carbon monoxide poisoning showed a steady increase.

Many physicians claim there is no antidote for it. The first thing to do is to get the victim out into the air as quickly as possible, endeavour to bring him back to consciousness by means of artificial respiration and, possibly, use oxygen.

Even the strongest men find it difficult to resist more than their own weight. Yet, a bluebottle fly can lift more than 30 times its own weight. It can draw a load that is 150 times heavier than itself.

Objects which are about forty times heavier than themselves are often carried by the muscivora weevil. You have seen those ear-splitting powerful drills which are used to tear up the road? Well, there is a mollusk known as the phidole or pholias drill, which can rival their power, and is a superior worker, as it makes no noise.

Silently, but none the less efficiently, the phidole bores through the hardest rock as casually as if it were soap.

Recipes For This Week  
(By Betty Barclay)

**OATMEAL COOKIES**  
1 1/2 cups special cake flour, sifted.  
2 teaspoons baking powder.  
1/2 teaspoon salt.  
2 teaspoons cinnamon.  
1 teaspoon cloves.  
1/2 cup butter or shortening.  
1 cup sifted brown sugar.  
1 egg, well beaten.  
1 1/2 cups oatmeal.

1/2 cup milk.  
Sift flour, once, measure, add baking powder, salt, and spices, and sift together three times. Cream shortening, add sugar gradually, and cream well. Add egg, add oatmeal and flour, alternately with milk, mixing well. Drop by teaspoons on greased baking sheet and bake in moderate oven (350 degrees Fahrenheit) 12 to 20 minutes. Makes 4 dozen cookies.

**THANKSGIVING CONSERVE**  
3 cups cranberries.  
1 cup diced apples.  
1 1/2 cups water.  
1 cup crushed pineapple.  
1 lemon, juice and grated rind.  
2 oranges, juice and grated rind.  
3 cups sugar.

Cook cranberries and apple in the water until tender. Add pineapple, oranges and sugar. Mix well and cook rapidly until thick and clear. Turn into sterilized glasses and when cold cover with paraffin.

**EVIDENCES OF PROSPERITY**  
Times Do Not Appear To Be So Bad  
In This Western City

Among a number of evidences of prosperity in Edmonton, cited by "The Journal," is the fact that the number of telephones in use has increased within a year from 16,124 to 16,641, or over 500. Another evidence is that "one wholesale house in the city sold \$300,000 worth of radio sets in September"—thus showing a fair volume of luxury spending.

**Award For Canadian Scientist**  
E. M. Kindle, chief of the division of paleontology, Dominion Department of Mines, is the recipient of an award by the United States National Research Council, it is announced at Ottawa. The award was made in recognition of Mr. Kindle's geological investigations.

Lubricants are being made from olive oil in Spain.

**Chapped Skin**  
Wind, snow and steel bristle unprotected skin surfaces. Moisture keeps the skin from tightening and affords full protection.

Some Mighty Midgets  
Many Small Creatures Stronger In Comparison Than Large Ones

It has been proved that the common snail can draw a load which is fifty times heavier than itself. If an elephant was as strong, in proportion to size, it would have to move nearly 270 tons.

That is only one specimen from Nature's collection of "mighty midgets" that perform in secret on land and in the sea.

Even the strongest men find it difficult to lift more than their own weight. Yet, a bluebottle fly can lift more than 30 times its own weight. It can draw a load that is 150 times heavier than itself.

Objects which are about forty times heavier than themselves are often carried by the muscivora weevil. You have seen those ear-splitting powerful drills which are used to tear up the road? ## SUNDAY SCHOOL LESSON

NOVEMBER 23

THE RICH YOUNG MAN—REFUSING A LIFE OF SACRIFICIAL SERVICE

Golden Text: "And He said unto all, 'If any man would come after me, let him deny himself, and take up his cross daily, and follow Me.'"  
Lesson: Mark 10:17-27.  
Devotional Reading: Psalm 137:1-4.

Explanations and Comments

Refusing a Life of Sacrificial Service, verses 17-22.—In Matthew the rich young man's question reads: "What good thing shall I do, that I may inherit eternal life?" and Jesus reply is: "Why askest thou that? Mark and Luke give the question as: 'Good Master, what shall I do that I may inherit eternal life?' and the reply of Jesus is: 'Why callest thou Me good? It is not I who am good, even God.' Jesus' question as given here seems to indicate that the young man had said the word good (Good Master) with as little thought as we do when we say "Good Morning." Jesus would have him weigh his words and see whether he meant what he had said. If he were calling him good in the sense of knowing what he was doing, he would accept his homage. Jesus always wanted those who came to him to know what he was doing. His disciples wanted to weigh well the consequences of following him. Jesus would have them to weigh well the consequences of following him. Jesus would have them to weigh well the consequences of following him.

What Following Christ Means.  
If this is the meaning of the word "choice," if he had gladly given up all he possessed to the poor and to the needy, he would have been a true follower of Christ. Jesus would have them to weigh well the consequences of following him. Jesus would have them to weigh well the consequences of following him.

The Choice the Rich Young Man Made.  
It was a dramatic moment when the young man was face to face with great Christ. The young man was face to face with great Christ. The young man was face to face with great Christ.

Sal Refinery Plant  
The London Vancouver Salt Company proposes to erect shortly a refining plant on False Creek to refine about 10,000 tons of salt yearly, bringing the raw product from the British Columbia and from the Dominion Government Exhibition Commission.

Oil men have borrowed an idea from dairymen by using the cream separator to extract petroleum from tar and sand.

One of the world's really "rare metals" is columbium, for only about 25 pounds of it exist today in sheets, bars, rods, and wire.

Glacier National Park, sometimes called the "trail park," has nearly a thousand miles of horse, foot, and fire trails.

Canadian Exhibit Wins  
The Canadian stand at the Ideal Home Exhibition at Edinburgh, Scotland, has been awarded the gold medal for general excellence, beating out 100 other exhibitors. The stand was prepared by the Dominion Government Exhibition Commission.

Jones—Happy are they who look before they make a move.  
Bones—Yes, and overlook afterwards.

JUST A tasteless dose of Phillips' Milk of Magnesia in water. It is so mild, effective, yet harmless. It has been the standard anti-acid for 50 years among physicians everywhere. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant and efficient way to kill the excess acid. The stomach becomes sweet, the pain departs. You are happy again in five minutes. Don't depend on crude methods.

Employ the best way yet evolved in the history of medicine. It is Phillips' Milk of Magnesia. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acid. Remember—the genuine is always a liquid. It cannot be made in tablet form. Look for the name Phillips' on the wrapper for your protection. Druggists everywhere have the 50c bottles.

Canadian Tobacco Production  
Total 1930 Crop Given As 36,712,700 Pounds  
Enough tobacco has been grown in Canada so that if distributed among the population would provide each man, woman and child with over 3 1/2 pounds. The total crop for 1930 is given as 36,712,700 pounds or nearly 7,000,000 pounds more than in 1928. This year's crop was grown on 41,391 acres, 32,170 of which were in Ontario, 9,000 in Quebec and 221 in British Columbia. Ontario accounted for 28,078,000 pounds of the total production. Quebec, 8,490,000 pounds and British Columbia, 144,700 pounds.

For several years several million pounds of tobacco have been exported to the British Isles, and it is expected that this year a considerable percentage of the crop will be exported.

Severals years several million pounds of tobacco have been exported to the British Isles, and it is expected that this year a considerable percentage of the crop will be exported.

## The Musical Crusaders at Work

Judged by the letters being received, countless thousands of Canadian and dwellers in the United States use in every Sunday afternoon to hear the Musical Crusaders of the Canadian Pacific Steamship Company in their descriptive program based on the Empire of Australia's round-the-world cruise. The above illustration shows the Crusaders at work under the leadership of Alper Beethers. They are in the newly fitted out radio studios of the C.P.R. at the Royal York Hotel, Toronto. These studios are among the finest in North America being equipped with the very latest devices developed for perfect broadcasting. There are two of these studios in the Royal York and from them, week by week, programs are broadcast throughout the length and breadth of Canada over the Canadian Pacific Railway Company's telegraph wires and chain of broadcasting stations.

### ANNOUNCEMENT

We are pleased to announce that beginning today we make another reduction in the price of lumber.

During the present year our prices have been reduced three times. Common lumber has been reduced \$0.00 per M. and finish lumber as much as \$23.00 since the beginning of 1930. We took this step in order to keep in line with the reduced cost prices of general commodities.—Beaver Lumber Co., Ltd.

### Red Cross Dance Success

The whist drive and dance held in the Masonic hall, last Friday evening, in aid of the Red Cross, was thoroughly enjoyed by all who attended.

Prizes at whist were won as follows: First, Mrs. J. B. Lowe and Mr. H. J. Cooper; Consolation: Mrs. G. P. Freebury and Mr. R. E. Gillespie. The quilt donated by Mrs. W. H. Peterson, was won by Mrs. Stonehouse of Cerebral.

Music by the Oyen orchestra proved popular and dancing continued till 3 a.m. Over \$70.00 was realised.

### WEDDING

DEVEREAUX—CASSIDY

The wedding of Monica, eldest daughter of Mr. and Mrs. T. M. Cassidy of Oyen, and Mr. George Devereaux of Benton, was solemnized in the Sacred Heart church on Wednesday, November 12, 1930, Father Lynnett, officiating.

In the evening the bride and groom received the congratulations and good wishes of their friends, at a dance held in the Masonic hall.

Young People's Club Entertained  
With Interesting Program

At the regular meeting of the young people's club held in the United Church last Monday, Mr. George Benbow gave an interesting talk on Beethoven with selections on the piano. Others taking part in the program were, Miss Alberta Wenger, who sang a song composed by Mr. Benbow, Mr. Robert Nisbet, solo, Miss Vera Kornichenko, musical selection and solo and a talk by Mr. Robert Campbell.
